property of the United States army. The first trip, made late yesterday, which proved to be something of a thriller for the navigator and his assistant, Sergt. Edward Ward, was considered successful, if it did not result in making a record.

There is a possibility that he may do this, but no great certainty. He is fond of his brother and would like to see him, but the French contracts are important and he may stay to close them.

It would be possible for the Wrights to me in place of Lieut. Selfridge. Sergt.

Ward will ride in the car with me today. WORLD SYMPATHY FOR WRIGHT

GERMAN AND FRENCH EXPERTS COMMENT ON ACCIDENT.

Von Hildebrandt Recalls Similar Catastrophes-Delagrange Would Not Fly So High.

BERLIN, September 19.-The press of Berlin contains many articles expressing sympathy with Orville Wright on his ac-

cident at Washington. Capt. Von Hildebrandt, the aviation expert, in an interview, deplores the disaster and hopes for the full recovery of

Wright for greater achievements. Capt. Von Hildebrandt recalls the death of the German aeroplanist, Otto Lillienthal, whose machine turned over in 1896 at a height of fifty feet, precipitating Lillienthal to his death, and mentions that Lillienthal's pupil, an Englishman, Percy C. Pilcher, was killed in 1899 because the

udder of his aeroplane failed to act. PARIS, September 19 .- M. Delagrange declares that an accident such as wrecked the Wright machine at Washrington had been foreseen by experts as liable chine to lose its equilibrium. Nevertheless he was surprised that

his second ascension at South St. Joseph Wright had not been able to stop the second propeller by cutting off the electrical contact, thereby restoring the balance and avoiding a fall. M. Delagrange said he believed it was not safe at the present stage of develop-

ment to fly at such a height as had the

Mr. Taft given in his written interview of September 15, to the effect that "independistas in the Philippines prefer a republican victory to Mr. Bryan's promise."
"When this appeared Mr. Fiske Warren
of Boston cabled to Mr. Albert Barretto
of Manila as follows:

'Taft declares independistas prefer republican triumph. Is this true? I desire immediate authoritative opinion of Centre or of yourself as president.'

"I might explain that the centre is the governing body of the nationalist party, and is composed of representatives elected from each of the thirty-nine provinces. Mr. Warren received the following reply: " 'Nationalist party, with immediate independence creed, prefers triumph of the democrats. General convention of the 12th of July agreed unanimously and join enthusiastically Bryan's platform.
(Signed) "'ALBERT BARRETTO.'

"The nationalist party is the largest group in the Philippines assembly, and it, according to Mr. Barretto, is unanimously opposed to Mr. Taft's selection. On June 18 the Philippine assembly, by a vote of 54 to 18, declared that the people desire immediate independence. If Mr. Taft wants to defend his policy on the ground that it ought to be adopted, whether the Filipinos want it or not, he can do so, but he cannot bring to the support of his position any authoritative declaration by any considerable portion of the Filipinos."

Great Turnout of People. Special From a Staff Correspondent.

NEW YORK, September 19 .- If this

were any place but little old New York C -hould speak of the crowds which listened to Mr. Bryan last night, both inside and outside of Carnegie Hall, as "vast." "unusual" and "significant." But this is New York, so I'll just say that a few acres of folks heard and tried to hear the Peerless last night, and that there seemed to be much interest and enthusiasm on tap. It wouldn't be wise to say more than this under a New York date line. People up here will go anywhere one, and they don't care much where it is or what they are going to see. They like dog fights, base ball and six-day bicycle races, and all such, and upon oc-casion they have been known to display some faint interest in the subject of politics. So there you are. There was a grand gang out last night to do honor to the Peerless in its own peculiar way, but whether the demonstration means anything or not 'twould take a wise man to tell, and I was not christened Solomon. I had the shirt torn off my back in the crowd last night, but I don't mind, as tis possible to pick up more genuine personal sentiment and local color by mixand other members of the Aerial Experiment Association in this city will attend the south, making an aerial trip danger—leading the south, making and serial trip danger—leading the south t well worth while.

Change in Bryan.

thing even faintly resembling an original remark. For last night in the great crowd in the general vicinity of Carnegie Hall and inside the hall itself it seemed as if I heard nothing else.

"He does not even look the same," said one elderly flame-eyed person behind whom I stood for a few minutes. "He is getting bald and fattish, he is calm, his gestures are ladylike and he looks like a conservative business man whose principal objects in life are to raise chins, children and money. Ah me! things ain't as they used to was." Everywhere since I became an atom in

the tall of the Bryan comet I have heard the same thing. Some democrats mention it with regret, more speak of it with joy. "Bill is settling," say the last mentioned quieted down in a heap. He has cut off some of the tail of his kite, and the blamed thing is steadler in consequence. The first time I heard him in 1896 I went daylight came I got up and drew out of the bank my balance of \$11.75 and hid it under the hearth. Then I went out and ernment guarantee of bank deposits certainly sounds good to me. Why, I'll bet four dollars to a passe straw hat that if today. The weather was almost perfect Bryan is elected the principal charge and the links were at their best. Travers against him by his republican opponent four years hence will be that he acted too his tee shot into the sand pit and in getgently toward malefactors of great wealth. Shucks! Why, Bill is a regular conservative these days!"

Honestly this isn't much overdrawn. Those folks who supported Bryan in 1896 and 1900 because they thought that when elected he would kick the protective tariff into the middle of next week, muss up the criminal statistics of the U.S.A., and generally raise old rastus in seventeen other directions, are real peevish nowadays because the Peerless-from their point of view anyhow-is as tame as a pet cat. They will vote for him, however, in the hope that he is "only fooling" and that after he is elected he will go to

peddling pyrotechnics once more. Conservatives Attracted.

On the other hand there is no question that many loyal democrats who voted for Parker in 1904, but who were muchly "irregular" in 1896 and 1900, are seriously contemplating getting back into the fold like the new Bryan-although some of them doubt whether he has changed in take a chance on what would happen and gave up the hole 4 to 3. should he be elected. The fact that there would probably be enough republicans in Congress to balance him in case he shouldn't be permanently "changed" un-doubtedly has a whole lot to do with their attitude.

It is fierce to be a candidate. Bryan couldn't stop off in Delaware to kiss Judge George Gray on the brow and discuss a few things in which they are mutually interested without being accused of having offered the judge the somewhat nifty job of chief justice of the Supreme Court of

the United States. This is in line with the story that Mr. appearing foolish and he is not announcing any cabinet slates as yet. The proposition simply appeared quite reasonable to a busy and prolific reporter, who had nothing else to mention at that particular time and so it went out with all the solemnity of a semi-official utterance. It inches of the cup on his second and holed won't do any harm. I shouldn't wonder out in 3 to 4, Behr having overpitched the story in print as long as it wasn't hitched to him. It is in the nature of teenth. He putted poorly, however, while another assurance to the conservatives.
